PROFESSIONAL SUMMARY

Aspiring Data Analyst currently in the 3rd term of the Post-Degree Diploma in Data Analytics at Langara College. Seeking a role in data analytics, business intelligence, or a related field. Proficient in Python, SQL, Power BI, and Excel. Strong analytical skills, problem-solving abilities, and experience with data-driven decision-making.

KEY SKILLS

- Data analysis, exploratory data analysis, and statistical modeling
- Python, R, and SQL for data manipulation and analysis
- Power BI and Excel for dashboards and reporting
- Data visualization and storytelling for decision-making
- Research, literature review, and academic writing
- Problem-solving, critical thinking, and attention to detail
- Team collaboration, adaptability, and fast learning
- Experience developing optimization models for logistics in fuel supply operations

EDUCATION/CERTIFICATION

Post-Degree Diploma in Data Analytics Langara College, Vancouver, BC September 2024 – December 2025

M.Sc. in Chemical Engineering Instituto Tecnológico de Celaya, Mexico January 2011 -December 2012

BSc. Chemical Engineering
Universidad Autónoma de San Luis Potosí, Mexico

August 2005 - May 2010

Exchange Program – Chemical Process Engineering INSA-Rouen, France

August 2008 – July 2009

RESEARCH EXPERIENCE

Research Project- Master's Thesis:

January 2011 -December 2012

Synthesis of mass and property integration networks.

Published articles:

- "An MINLP Model that Includes the Effect of Temperature and Composition on Property Balances for Mass Integration Networks"
- "Property integration models with interdependence mixing operators"
